

October 1, 2008

Based on information supplied to us by the manufacturers of our paper products, we certify our paper meets the requirements of ASTM F963-03 standard (Child Safety of Educational Products) for lead content. Our paper also conforms to standard 16CFR1303 that it does not contain paint or latex that may contain lead. These statements are backed by a letter from our suppliers indicating confirmation of this by their review of the Material Data Sheets for all the ingredients utilized in the manufacture of paper for us by their company.
