Earned Value Detail Report

In the table below you will see the mailpiece counts for April through June 2018 for each MID. These volumes are used to determine your threshold for participation in the 2019 Earned Value Promotion. Thresholds are calculated at the CRID level. If there are multiple MIDs linked to a CRID, the BRM, CRM and Share Mail * pieces are totaled to determine one threshold for the CRID. The 95% threshold is calculated on the total piece count for each CRID.
* Share Mail piece counts will be available after the next software Release in mid-March.

The "Total by CRID" and "95% Threshold" columns at the end will have the sum total of the MIDs associated with that CRID -- the same total and threshold amount will appear on each CRID line. In the case above, the mailer has 2 MIDs that are attached to the same CRID (0408572). Note how the Total By CRID and 95% Threshold appear on both lines. These figures are the total of both MIDs that are associated with that CRID
